6 REASONS WHY SO MANY HOMEOWNERS ARE CHOOSING A GAS FIREPLACE INSERT:

EASY TO USE

No mess, no hassle... just sit back and enjoy your fireplace.

BEAUTIFUL

From underused to unbelievable in as little as a day.

SAFER

No open flame in order to protect little hands.

WARMER

Heat when you want it at the touch of a button.

EFFICIENT

Save up to \$200 in energy costs each year.

VALUE

Enhance the resale value of your home.

BRING BACK

WARMTH AND COMFORT

Revamp your dated, drafty fireplace by installing a **gas fireplace insert**.

From a simple swap to a whole hearth remodel, a beautiful, warm and easy-to-use fireplace is within reach.

A gas fireplace insert can increase your heating efficiency from

15% to 70%

By replacing your wood fireplace with a gas fireplace insert, you can boost heating efficiency from around 15% with wood to around 70% with gas. This means more fuel is converted into usable heat and you stay warmer.

MEASURE

Take measurements for your fireplace to ensure you select the appropriate size and model for you.

SELECT

Choose your front, surround, interior panels and media to match your insert to your style.

SCHEDULE

Schedule your professionally installed gas fireplace insert, typically in less than a day.*

Entire project may take longer or require multiple trips.
