Fmi

Warm Up To A High-Efficiency Gas Log Heater

There's a tremendous demand for vent-free gas heaters, because at 99%, they're the most energy-efficient of all hearth products. Fmi's new Ember Master vent-free gas log heaters deliver these benefits and more. They feature patented, glowing ember ramp technology for the most beautiful and realistic vent free flame presentation in the hearth industry.

Homeowner Highlights:

- **Visual appeal**—Realistic new ceramic fiber logs and ember beds feature intricately detailed bark, split wood, glowing ember beds and even charred log textures. Patented ember ramp technology and proprietary Ceramat® ember material provides glowing ember beds and burning coals along with random dancing yellow flames for a full and impressive flame picture.
- **Control choices**—Ember Master vent free gas log heaters are available with variable manual, wall switch, toggle switch or hand held remote control operations. All models come standard with electronic push button ignition.
- **Dollar-saving efficiency**—All Ember Master gas log heaters provide 99% energy efficiency which means dramatic energy savings.

Builder Benefits:

- **Versatile, space saving installation**—With no chimney to worry about, an Fmi gas log heater (in an Fmi vent free gas fireplace) is an extremely economical way to include a complete hearth feature to any floorplan. And they can be added just about anywhere.
- **Economical**—Installation costs come way down when you eliminate venting construction. Particularly in multi-story housing.

(24") "EZ" Series logs feature patented glowing ember ramp burner design, and are available with variable manual, or remote-ready control.

(cover: (24") "EC" Series gas log heaters feature beautiful new log arrangement with glowing ember bed with proprietary Ceramat® loose ember material, and new triple burner design. Convenient on/ off switch is concealed in hearth media log.

(Sizing chart (modified for ec, and ez-series logs)
