

Fireplace Heater™

America's #1 Fireplace Furnace

Don't throw your heat away!

Works during a power outage.

The Fireplace Heater™ was developed to dramatically increase convection heat (hot air) coming from your fireplace. The unique design super heats the air within the exchanger tubes to over 500°F. This will help to keep your house warm.

Increases Fireplace Efficiency 500%

The Ultimate Heating System

- Keep your family warm
- 60,000 BTU output
- Air temperature output 500°F
- Low cost
- Back up heat source

Make the fireplace heater part of your heating plan.

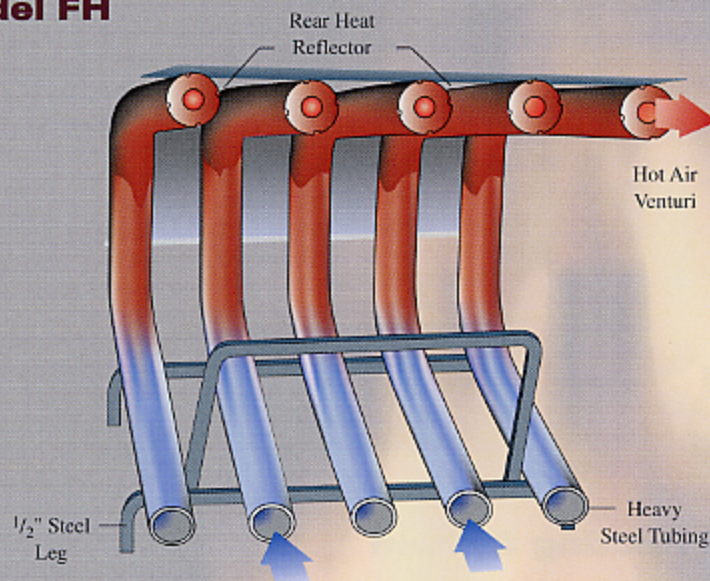

Fireplace Heater™

Versatile Woodburning or Gas Log Hearth Heater Helps Cut Back Heat Bills

Model FH

Features of Heater

- Low cost
