Warm Up To A High-Efficiency Gas Log Heater

Heat Majic™

VENT-FREE GAS LOG HEATERS

There's a tremendous demand for vent-free gas heaters because at 99 percent, they're the most energy-efficient of all hearth products, and can be installed virtually anywhere. Fmi's Heat Majic™ vent-free gas log heaters deliver these benefits and more. They combine the safe, reliable warmth and efficiency of vent free gas space heating with the beauty and convenience of gas logs.

Homeowner Highlights:

- **Visual Appeal** - Realistic ceramic fiber log presentations feature intricately detailed bark, split wood, and even charred textures along with random dancing yellow flames for a full and impressive flame picture.
- **Variety of Design & Control Choices** - Heat Majic™ vent free gas log heaters utilize premium, stainless tube burners, available in single and dual flame designs with manual or remote ready control operation and piezo ignition. We've even got multi-view models for see-thru and peninsula fireplaces.
- **Dollar- Saving Efficiency** - All Heat Majic™ gas log heaters provide 99% energy efficiency which means dramatic energy savings.

Builder Benefits:

- **Versatile, Space Saving Installation** - With no chimney to worry about, a Heat Majic™ gas log heater (in an Fmi vent-free fireplace) is perhaps the most economical way to include a complete hearth feature in any floorplan. And they can be added just about anywhere.
- **Economical** - Installation costs come way down when you eliminate venting construction. Particularly in multi-story housing.

"HD" Series gas log heaters feature dual flame burner system with manual or remote-ready control.

Economical "H" Series models include single burner design with variable manual control.

FVFM multi-view logs are beautiful from any angle in either see-thru or peninsula fireplaces.
